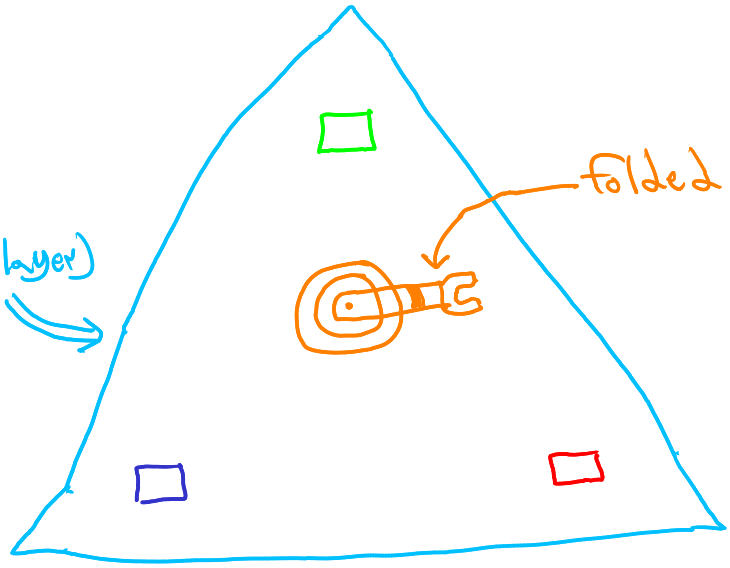
Concept

Driving system:-

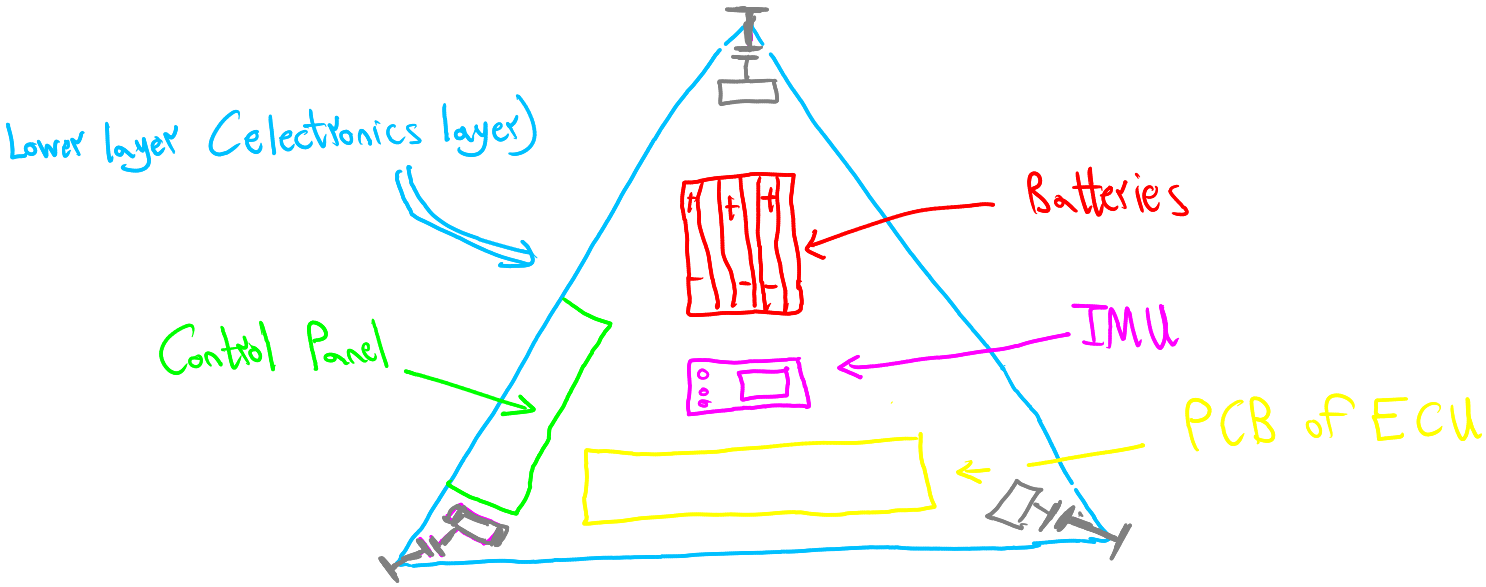
- Omni drive (Kiwi drive) ⟹ 3 wheels (Slipping↓)
- Mecanum drive ⟹ 4 wheels  (Slipping↑)

- Chassis ideas:-

- Idea 1



- Red storage box
- Blue storage box
- Green storage box
- Chassis upper layer of mobile robot
- Robotic arm (manipulator)



- IMU : Preferred to be beside PCB but IMU should be in a stable place to not affect its readings.

- Control panel : Contain emergency switch, fuses and other safety element, Indicator lamp, ON/off switch

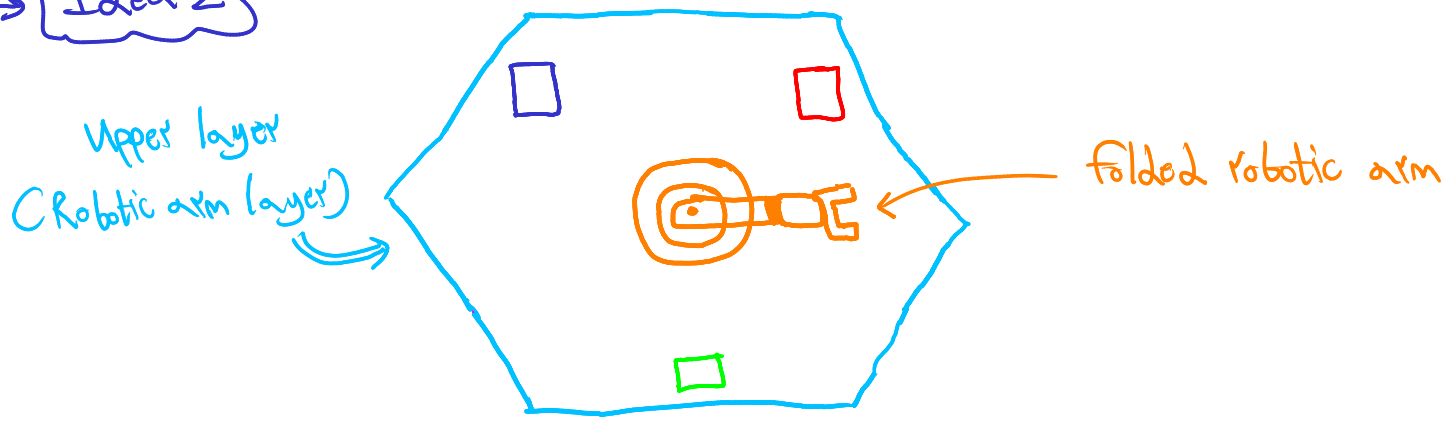
- PCB of electrical control unit

- Batteries with holder

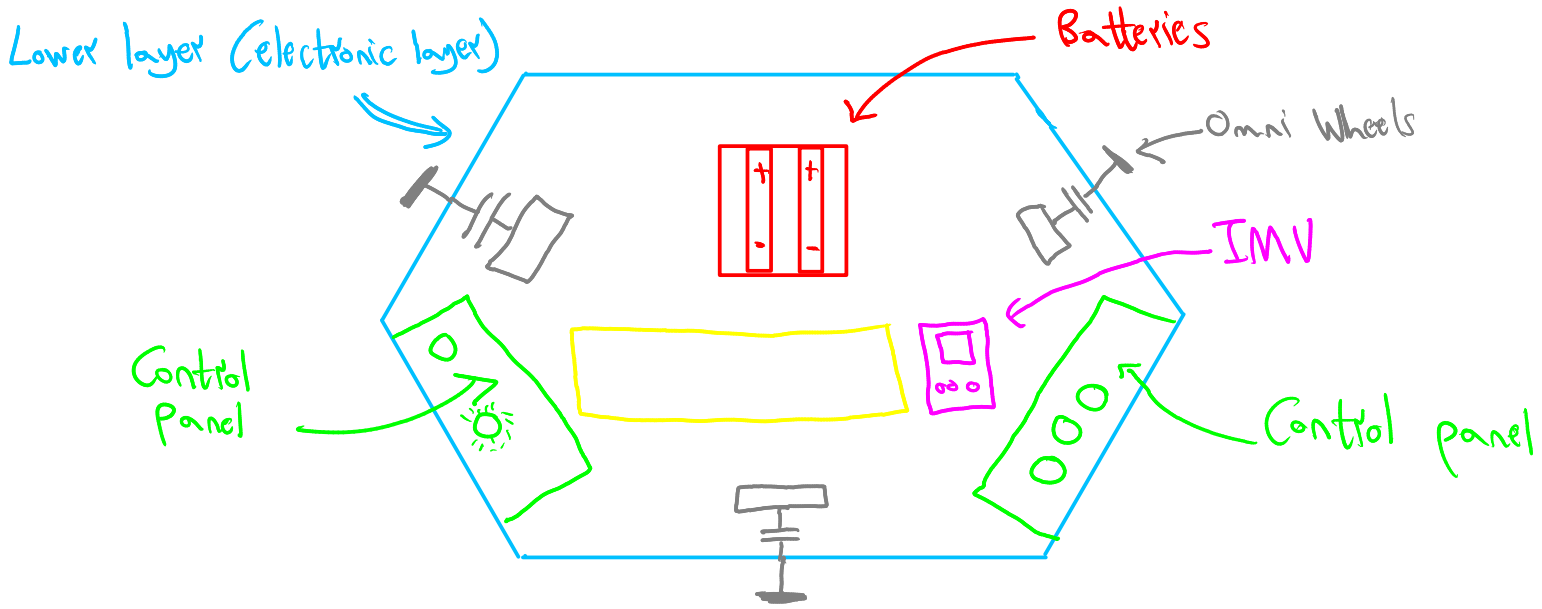
- Chassis Lower layer of mobile robot

- Omni Wheels (Kiwi drive) with powertrain system

Idea 2



- Red storage box
- Blue storage box
- Green storage box
- Chassis upper layer of mobile robot
- Robotic arm (manipulator)



- IMU : Preferred to be beside PCB but IMU should be in a stable place to not affect its readings.

- Control panel : Contain emergency switch, fuses and other safety element, Indicator lamp, ON/OFF switch

- PCB of electrical control unit

- Batteries with holder

- Chassis Lower layer of mobile robot

- Omni Wheels (Kiwi drive) with powertrain system
